Solar Allocation

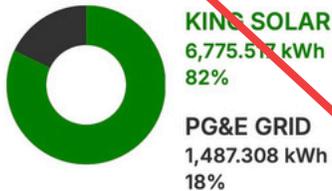

Chart based on total consumption of 8,262.825 kWh for the current billing period.

+ Prior Billing Activity Total	\$0.00
Previous Bill Amount Dec 10, 2025 - Jan 8, 2026	\$5,665.11
Payment(s) Received	-\$5,665.11
Charges for Period Jan 9, 2026 - Feb 9, 2026	\$6,322.55
PG&E Total	\$3,597.14
Solar Energy Total	\$3,028.23
Your Solar Savings (10%)	-\$302.82
Your lifetime solar savings is \$7,332.82	
= Amount Due by Mar 3, 2026	\$6,322.55

OneBill™ keeps track of your total savings since the beginning of the program.

Your bill clearly shows your charges for both solar and grid electricity, and most importantly, your 10% savings that is always applied to the solar portion of your bill.

OneBill™ shows you how much of your energy came from the grid, and how much came from solar.

SAN LUIS OBISPO, CA 93401

The statement shows what your total energy charges would have been if all electricity had been purchased directly from the utility, before any solar energy was applied.

Summary of Charges Jan 9, 2026 - Feb 9, 2026 (32 days)

=	PG&E Total (Before Solar) Sum of retail energy costs of participating meters and residual PG&E costs on your bill	8,262.825 kWh	\$6,625.37
	Meter Number 1009449430	8,262.825 kWh	\$3,951.62
	Passthrough Costs PG&E costs not related to solar program ¹		\$2,673.75
-	PG&E Total PG&E bill after applying solar credits		\$3,597.14
=	Solar Energy Total (Before Savings) Difference between retail energy costs and billed costs		\$3,028.23

This corresponds to the residual utility bill for this billing cycle and represents the actual amount still due to the utility.

Together, these figures show the full picture: what your energy would have cost without solar, how much energy was offset by solar, and the total retail value of the solar energy that was applied to your bill.

Passthrough Costs not related to solar program can include things like gas usage, non-participating electric meters, taxes, or other services with the utility.

¹ Passthrough costs billed by PG&E not related to participation in this solar program; such as non-participating electric meters, gas usage, or other services you may have with the utility.

Energy Commission Surcharge	\$2.48

Total for Meter 1009449430 **\$3,951.62**

The billing period and rate tariff are listed to clearly show which dates and pricing apply.

The statement shows the electricity supplied by both solar and the grid, making it easy to see how much of your energy came from each.

These are the retail rates of energy before the 10% discount is applied. These rates vary by region, season, and time of day.

This total represents the total cost of the electricity for the meter, before any additional passthrough costs from the grid or your savings from solar are applied.
